

The Tenets of The FM: Therapy

Dr. Thanatos

Vernal Equinox (03.20.10 C.E.)

Scientific research shows a close link between music and emotion
Most people—including us—often struggle with affective processes
We experience problems both between people and within ourselves
Time spent behind the turntables allows us to manage these issues

We'll fight externally and internally until the music starts
No one can argue with the beauty and horror of our culture
Thus our music is therapy both literally and figuratively
